William Holt Gordillo

DATA ANALYST / ENGINEER: DBT, SQL, PYTHON

+34 601 214 782 | Williamholt748@gmail.com | linkedin.com/in/william-holt-gordillo-b541991a3 | github.com/WilliamGordillo |

Cádiz, Spain

PROFESSIONAL SUMMARY

Data analyst and engineer building data pipelines and clean, tested data models, with the **dbt Analytics Engineering Certification**. At Blue Marketing, build and maintain Python scripts that use APIs and web scraping to extract data from client platforms and load it into MySQL databases, and overhauled ETL processes, cutting processing time by **75%** on one pipeline. For Direct Line Group, decommissioned a legacy Redshift database by rewriting pipelines in **SQL over billions of rows**. Built an end-to-end personal **dbt** project (github.com/WilliamGordillo/dbt-yellow-taxi): staging, intermediate and mart models for revenue analytics, incremental models, data tests, source freshness checks and SCD Type 2 snapshots. Communicate technical findings clearly to technical and non-technical stakeholders. Native English and Spanish.

CORE COMPETENCIES

Data modelling with SQL and dbt | Data quality: automated dbt tests and freshness checks | Python data pipelines from APIs and web sources | ETL troubleshooting and optimisation | Query performance optimisation | Redshift data warehouse, Athena, Snowflake, PostgreSQL | Documentation of existing logic | AI-assisted coding

WORK EXPERIENCE

Blue Marketing

October 2025 - Present

Data Analyst

Marbella, Spain

- Build and maintain Python scripts using APIs and web scraping to extract data from client platforms, transform it into the required format, and load it into both the company platform and MySQL databases.
- Overhauled multiple ETL processes, reducing processing time by **75%** on one pipeline and eliminating a dependency on CSV files in another, improving reliability and maintainability.
- Develop and maintain semi-automated reports including daily and weekly revenue dashboards used by the finance team and campaign performance specialists.
- Support ad hoc analysis and Power BI reporting by maintaining clean, structured data in MySQL.

Katalyze Data (contracted to Direct Line Group)

March 2024 - April 2025

Data Analyst / Engineer

London, UK

- Decommissioned a legacy Redshift database by rewriting pipelines in **SQL over billions of rows**, delivering a more cost-effective and maintainable solution.
- Participated in the migration of Qlik dashboards to Tableau by documenting existing logic, enabling a streamlined and consistent transition process.
- Analysed and migrated SAS jobs spanning dozens of scripts and thousands of lines of code, ensuring continuity and accuracy throughout.
- Communicated complex technical findings clearly to both technical and non-technical stakeholders.

Number10 & Win Inglés

November 2023 - March 2024

English Teacher

Sanlúcar de Barrameda, Spain

- Taught English to students of all ages and proficiency levels, adapting lesson plans accordingly.
- Prepared students for Cambridge English Qualification exams at B2 and C1 levels.

PROJECTS

NYC Yellow Taxi Analytics (dbt project) Personal project, 2026

End-to-end dbt project on PostgreSQL: Python ingestion into a raw schema, then staging, intermediate and mart models for revenue, payment and demand analytics. Incremental models, SCD Type 2 snapshots, Jinja macros, hooks and dbt_utils, with generic, singular and dbt_expectations tests plus source freshness checks.

dbt, PostgreSQL, Python, dbt_utils, dbt_expectations

Association of Cervical Electrical Impedance Spectroscopy and Cervicovaginal Metabolite Composition in High-Risk Women (MSc)

Conducted data analysis on large medical datasets using R and Excel, covering data cleaning, visualisation and statistical analysis to identify correlations. Presented findings to faculty in a detailed dissemination document featuring complex visualisations and statistical outputs.

R, Excel

EDUCATION

MSc Biological Science, First Class Honours University of Sheffield 2023

Key modules: Data Analysis, Advanced Biological Analysis, Research Projects, Dissertations, Communication Skills

High School Degree, 9/10 Overall Grade I.E.S Francisco Pacheco

Key modules: Mathematics, Physics, Industrial Technology

CERTIFICATIONS

dbt Analytics Engineering Certification

SAS Certified Specialist

SKILLS

Programming Languages: SQL (window functions, complex joins, query performance tuning), Python, SAS, R

Tools & Platforms: dbt, Redshift, Athena, PostgreSQL, MySQL, Snowflake, Git, Pandas, NumPy, Power BI, Excel, Google Sheets (incl. Sheets API from Python), Tidyverse

Analysis: Statistical Analysis, Regression, Data Visualisation, Big Data, Hypothesis Testing (incl. Student's t-tests), Time-Series Analysis

AI Tools: AI-assisted coding (generating and reviewing code) **Languages:** Native English and Spanish
