Cádiz, Spain

PROFESSIONAL SUMMARY

Data Analyst / Engineer designing and optimising **Python and SQL ETL pipelines** across multiple data sources: ingestion from APIs and web scraping into MySQL, and ETL overhauls (**75% less processing time** on one pipeline). For Direct Line Group, I rewrote the pipelines of a legacy Redshift database in **SQL over billions of rows** so it could be decommissioned, and migrated SAS jobs while ensuring continuity and accuracy. I work on **data quality and validation** with dbt tests (dbt Analytics Engineering Certification). Background in statistical analysis and regression (MSc). **Native English and Spanish.**

CORE COMPETENCIES

Python and SQL ETL pipelines | Multi-source data ingestion | Advanced SQL at scale | Data quality and validation | Data modelling with dbt | Pipeline and database migration | Statistical analysis and regression | Communication with technical and business teams

WORK EXPERIENCE

Blue Marketing

October 2025 - Present

Data Analyst

Marbella, Spain

- Build and maintain **Python** scripts using APIs and web scraping to extract data from client platforms, transform it into the required format, and load it into both the company platform and MySQL databases.
- Overhauled multiple ETL processes, reducing processing time by **75%** on one pipeline and eliminating a dependency on CSV files in another, improving reliability and maintainability.
- Support ad hoc analysis and Power BI reporting by maintaining clean, structured data in MySQL.
- Develop and maintain semi-automated reports including daily and weekly revenue dashboards used by the finance team and campaign performance specialists.

Katalyze Data (contracted to Direct Line Group)

March 2024 - April 2025

Data Analyst / Engineer

London, UK

- Decommissioned a legacy Redshift database by rewriting pipelines in **SQL over billions of rows**, delivering a more cost-effective and maintainable solution.
- Analysed and migrated SAS jobs spanning dozens of scripts and thousands of lines of code, ensuring continuity and accuracy throughout.
- Communicated complex technical findings clearly to both technical and non-technical stakeholders.
- Participated in the migration of Qlik dashboards to Tableau by documenting existing logic, enabling a streamlined and consistent transition process.

Number10 & Win Inglés

November 2023 - March 2024

English Teacher

Sanlúcar de Barrameda, Spain

- Taught English to students of all ages and proficiency levels, adapting lesson plans accordingly.
- Prepared students for Cambridge English Qualification exams at B2 and C1 levels.

PROJECTS

NYC Yellow Taxi Analytics (dbt project) Personal project, 2026

Built an end-to-end dbt project on PostgreSQL: Python ingestion into a raw schema, then staging, intermediate and mart models for revenue, payment and demand analytics. Used incremental models, SCD Type 2 snapshots, Jinja macros, hooks and dbt_utils, with generic, singular and dbt_expectations tests plus source freshness checks.

dbt, PostgreSQL, Python

Association of Cervical Electrical Impedance Spectroscopy and Cervicovaginal Metabolite Composition in High-Risk Women (MSc)

Conducted data analysis on large medical datasets using R and Excel, covering data cleaning, visualisation and statistical analysis to identify correlations. Presented findings to faculty in a detailed dissemination document featuring complex visualisations and statistical outputs.

R, Excel

EDUCATION

MSc Biological Science, First Class Honours University of Sheffield 2023

Key modules: Data Analysis, Advanced Biological Analysis, Research Projects, Dissertations, Communication Skills

High School Degree, 9/10 Overall Grade I.E.S Francisco Pacheco

Key modules: Mathematics, Physics, Industrial Technology

CERTIFICATIONS

dbt Analytics Engineering Certification

SAS Certified Specialist

SKILLS

Programming Languages: Python, SQL (window functions, complex joins, query performance tuning), SAS, R

Tools & Platforms: dbt, Snowflake, MySQL, PostgreSQL, Athena, NumPy, Pandas, Power BI, Git, Excel, Google Sheets (incl. Sheets API from Python), Tidyverse

Analysis: Statistical Analysis, Regression, Data Visualisation, Big Data, Hypothesis Testing (incl. Student's t-tests), Time-Series Analysis

AI Tools: AI-assisted coding (generating and reviewing code) **Languages:** Native English and Spanish
